

HUMPBACK HIGHWAY

Diving into the mysterious world of whales

VANESSA PIROTTA

- **Vanessa is a publicist’s dream! She’s an experienced media presenter, enthusiastic, knowledgeable and a great storyteller**
- **Full of fascinating details — including everything you need to know about whale snot and poo! — the book also highlights how much we have yet to discover about these majestic creatures**
- **Explores cutting-edge emerging technologies and the future of whale conservation**

I entered the water quietly and saw two humpback whales sleeping diagonally in the distance. Two school buses just hanging in space...

Acclaimed wildlife scientist Vanessa Pirotta has been mugged by whales, touched by a baby whale and covered in whale snot. In *Humpback Highway*, Pirotta dives beneath the surface to reveal the mysterious world of humpback whales — from their life cycle and the challenges humans present to these marine giants to why whale snot and poo are important for us and the ocean. Plus the cutting-edge new technologies (including tagging whales so that they communicate with satellites) that allow us to see where they swim, listen to them talk and even spy on them underwater.

About the author:

Dr Vanessa Pirotta is a wildlife scientist and science communicator. Her research uses innovative technologies for wildlife conservation. Her best-known research involves

using drones to collect whale snot (lung bacteria) from humpback whales to assess whale health. Whale research has taken Vanessa around the world to places such as Antarctica, Tonga and Madagascar. She is the author of the children’s book, *The Voyage of Whale and Calf*.

HOW TO KNIT A HUMAN

A memoir

ANNA JACOBSON

- **Poetically told, Anna Jacobson powerful memoir does not shy away from the difficulties of living with psychosis, yet is also a story of recovery and the process and piecing together life after an episode of serious mental illness**
- **Illustrated with line drawings, the book takes its name from the author’s joy in knitting and art as a means of recovering memory and self, while looking at the ongoing impacts of memory loss and the time it takes to recover**
- **Candidly shares positive and negative experiences with the health care system, including involuntary treatment with Electroconvulsive therapy**

I want to know what it was like to have crossed into the realm of madness. After all, I did it. I went mad. Why can't I have the secret knowledge that comes with it?

How do you write a memoir when you have lost your memories? She awakens in hospital, greeted by nurses and patients she doesn't recognise, but who address her with familiarity. She decides to untangle the clues.

How to Knit a Human is about the splintering of memory from psychosis and Electroconvulsive therapy that Anna Jacobson experienced as an involuntary patient in 2011. Through knitting and assemblage, weaving experiences around the gaps of memories that are not accessible, the memory barriers begin to crumble. This book is a reclamation of memory and self.

‘In this wise, wry and moving memoir Anna Jacobson reclaims her self from the institutions that sought to define her.’ — Mireille Juchau

‘This book is a revelation. If Leonora Carrington teamed up with Janet Frame you might get something close to the kind, gentle, weird and brutal brilliance of *How to Knit a Human*. Anna Jacobson has shifted my perspective on art and illness. 100 stars. Bravo!’ — Kris Kneen

About the author:

Anna Jacobson is an award-winning writer and artist from Meanjin (Brisbane). Her poetry collection *Amnesia Findings* won the 2018 Thomas Shapcott Poetry Prize. Anna’s second illustrated poetry collection, *Anxious in a Sweet Store* was published in 2023. She holds a Doctor of Philosophy in Creative Writing from the Queensland University of Technology.

VINTAGE CROCHET
Classic Australian Patterns
NATIONAL LIBRARY OF AUSTRALIA

- Features 34 vintage crochet patterns for garments, homewares, accessories and children’s toys, updated to suit today’s crocheter
- Vibrant, fresh design with full-colour illustrations
- Introduction to the basics of crochet and instructions on how to understand vintage patterns
- Patterns given a difficulty rating; there is a project to suit all crocheters, from beginners to experts
- Includes 14 illustrated spreads with fascinating reflections on the social and cultural history of crochet

Vintage Crochet builds on the success of *Vintage Knits* (2022) and features vintage patterns from Australian publications such as the *Australian Women’s Weekly* and the *Australian Woman’s Mirror*. The book presents a curated selection of patterns from these publications from as early as 1888, tried and tested to suit the needs of the modern day crocheter. The book contains instructions for a variety of vintage garments, accessories, toys and homewares, including a flapper unisex waistcoat from 1928, a shopping bag from 1950 and a granny-square playsuit from 1970. Each pattern will be accompanied by illustrations from the original publication and modern photographs of the newly crochet piece.

The occasional text boxes trace social, cultural and historical threads connected to crochet such as the history of the ‘granny square’, finger crocheting, significant Australian patternmakers and more.

Tapping into the trend for everything vintage, as well as the ‘handmade revolution’ and resurgence of crochet, this book will bring style and joy to any modern crocheter. It’s going to be perfect as a Mother’s Day gift, but also attractive to the younger crowd of crocheters.

‘McAlister...is erudite, irresistible.’ — *Nature*

METAMORPHOSIS

How insects are changing our world

ERICA MCALISTER, WITH ADRIAN WASHBOURNE

- A treasure trove of remarkable insect discoveries that promise to transform many branches of science
- Features intriguing stories of scientists’ journeys of discovery and the insects that they championed
- Each chapter is devoted to a species, with the text covering fleas, mosquitoes, moths, butterflies, locusts, blowflies, bees, and cockroaches

Insects are incredibly weird. Their morphology is about as alien to us as you can get without leaving this planet. They outnumber us 200 million to one. Before humans stamped their mark on this planet, insects had shaped it into the colourful and extraordinary world we all share today.

Whether it’s the astonishing properties of resilin, the protein that makes fleas jump; the proboscis of the mosquito’s mouth being used to develop smart needles; or the computational dynamics gleaned from studying locust swarms in Africa — Erica McAlister and Adrian Washbourne reveal the wonder of insects, the historical figures who have made great breakthroughs in understanding them, and the increasingly vital role they play in ensuring life, as we know it, continues.

INSPIRING CHANGE

How to Influence Behaviour for a Better World

EDITED BY LIAM SMITH, JIM CURTIS, PETER BRAGGE, PAUL KELLNER

- **Heavily illustrated with diagrams, figures and tables**
- **Case studies with real-world examples involving partnerships with Ambulance Victoria, VicRoads, EPA**
- **BehaviourWorks Australia is the largest applied behaviour change unit in Australia**

Change can be hard. We try our best as individuals to improve our fitness, dietary habits and financial stability, and to do the right thing by others and the planet, but it often falls to government and other institutions to persuade us to change our ways.

BehaviourWorks Australia (BWA) is a leading behaviour change research enterprise in Australia, housed in the Monash Sustainable Development Institute at Monash University. Their work spans hundreds of projects with government, industry and community partners in areas such as health, climate change, energy, water, waste, pollution, biodiversity, biosecurity, education, social inclusion, finance and safety. Based on extensive research and experience, the team at BWA developed the highly respected BehaviourWorks Method — a tried and tested approach to influencing behaviour for impactful and meaningful outcomes to build a better world.

Featuring real-world case studies involving partnerships with Ambulance Victoria, the Transport Accident Commission, federal and state governments, the Environment Protection Authority and Sustainability Victoria, *Inspiring Change* is a practical, in-depth guide on how to use the BehaviourWorks Method to foster economic prosperity, better health, social inclusion and environmental sustainability.

About the editors:

BehaviourWorks Australia is a leader in behaviour change research and includes researchers from a raft of different disciplines, all of whom share a passion for using behavioural science approaches to help solve real-world problems. *Inspiring Change* is a collective effort by the team at BWA and is edited by **Liam Smith, Jim Curtis, Peter Bragge** and **Paul Kellner**.

‘Dethroned is set to become a classic on the end of India’s and Pakistan’s aristocracy.’ — *The Spectator*

DETHRONED

The Downfall of India’s Princely States

JOHN ZUBRZYCKI

- **Exclusive ANZ Paperback!**
- **The dramatic true story of the betrayal of hundreds of Indian princely states by both the departing British and the new Congress government**
- **Recounts Mountbatten’s doomed efforts to save the subcontinent from being engulfed in violence**
- **The author is an expert on Indian history and culture, having worked in the country as a foreign correspondent and diplomat and written several books on the subject**

In July 1947, India’s last Viceroy, Lord Louis Mountbatten, stood before New Delhi’s Chamber of Princes to deliver the most important speech of his career. He had just three weeks to convince over 550 sovereign princely states — some tiny, some the size of Britain — to become part of a free India.

Once Britain’s most faithful allies, the princes could choose between joining India or Pakistan, or declaring independence. This is a saga of intrigue, brinkmanship and broken promises, wrought by Mountbatten and two of independent India’s founding fathers: the country’s most senior civil servant, V.P. Menon, and Congress strongman Vallabhbhai Patel. What India’s architects described as a ‘bloodless revolution’ was anything but, as violence engulfed Kashmir and Indian troops crushed Hyderabad’s dreams of independence.

Most princes accepted the inevitable, exchanging their power for guarantees of privileges and titles in perpetuity. But these dynasties were still led to extinction — not by the sword, but by political expediency — leaving them with little more than fading memories of a glorified past.

‘[A] gripping history exhaustively researched, and written with all the pace and tension of a thriller of how the fate of the princely states would be determined in the face of independence and Partition.’ — *The Telegraph*

‘Journalistic flair shines through in *Dethroned*.’ — *The Week*

PLANKTON

A Worldwide Guide

TOM JACKSON, JENNIFER PARKER,
CONSULTANT EDITOR DR. ANDREW HIRST

- **A richly illustrated guide to the marvellously diverse plankton of the world and their fundamental role in planetary food webs**

Plankton are the unsung heroes of planet Earth. Passive drifters through the world’s seas, oceans, and freshwater environments, most are invisible or very small, but some are longer than a whale. They are the global ocean’s foundation food, supporting almost all oceanic life, and they are also vitally important for land-based plants, animals, and other organisms. *Plankton* provides an incomparable look at these remarkable creatures, opening a window on the elegance and grace of microscopic marine life.

This engaging book reveals the amazing diversity of plankton, how they belong to a wide range of living groups, and how their ecology, lifestyles, and adaptations have evolved to suit an enormous range of conditions. It looks at plankton life cycles, the different ways plankton feed and grow, and the vast range of strategies they use for reproduction. It tracks where, how, and why plankton drift through the water; shares perspectives on migrations and population explosions or ‘blooms’ and why they happen; and discusses the life-sustaining role of plankton in numerous intertwined food webs throughout the world.

Beautifully illustrated, *Plankton* sheds critical light on how global warming, pollution, diminishing resources, and overexploitation will adversely impact planktonic life, and how these effects will reverberate to every corner of our planet.

PIPING HOT BEES AND BOISTEROUS BUZZ-RUNNERS

20 Mysteries of Honey Bee Behavior Solved
 THOMAS D. SEELEY

- **A biologist's up-close account of how he and fellow biologists cracked long-standing puzzles about honey bee behaviour**

Piping Hot Bees and Boisterous Buzz-Runners takes readers inside a world seldom seen even by beekeepers, shedding light on twenty of the most compelling mysteries of honey bee behaviour.

Thomas Seeley has devoted a lifetime to the study of honey bees and their colonies, unravelling the secrets of these wondrous insects in a career spanning six decades. In this book, he weaves illuminating personal stories with the latest science, explaining such mysteries as how worker bees function as scouts to choose a home site for their colony, furnish their home with beeswax combs, and stock it with brood and food while keeping tens of thousands of colony inhabitants warm and defended from intruders. Along the way, he shares the experiences that drew him to these studies, the small observations that led to big breakthroughs, and the sense of excitement that came with probing each mystery.

Richly illustrated, *Piping Hot Bees and Boisterous Buzz-Runners* provides a rare look at how a singularly passionate scientist and his colleagues deciphered the pipings, shakings, and puzzling tremble dances of honey bees, and how this journey of scientific discovery continues to shape our understanding of these remarkably intelligent and vitally important insects.

'Beekeepers will watch bees afresh and with even more astonishment after reading about these subtle yet highly sophisticated behaviours and how they were ingeniously discovered.' — Stephen Fleming, co-editor of *BeeCraft* magazine

'Piping Hot Bees and Boisterous Buzz-Runners is Thomas Seeley at his best, an engaging blend of keen observation, rigorous science, and personal reminiscence. More than just fascinating descriptions of bee behavior, this is a love letter, written by someone enamored from a lifetime spent studying honey bees.' — Mark L. Winston, author of *Bee Time: Lessons from the Hive*

TWELFTH NIGHT

Illustrated by Eric Ravilious

WILLIAM SHAKESPEARE, ILLUSTRATED BY ERIC RAVILIOUS, INTRODUCTION BY ALAN POWERS

- A stunning facsimile of the 1932 edition of *Twelfth Night* illustrated by Eric Ravilious

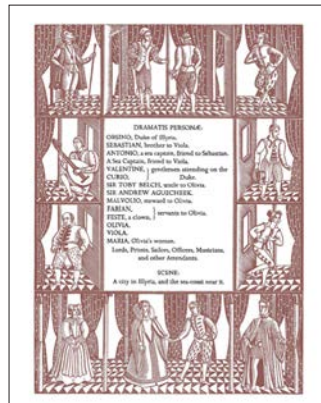

Together with a newly commissioned introduction, this book includes a facsimile of one of Eric Ravilious's finest illustrated works, first published by the Golden Cockerel Press in 1932 in a limited print run and now considered a masterpiece of typography and illustration.

Artist and illustrator Eric Ravilious was fascinated with Elizabethan and Jacobean poetry and drama, both as literature and as visual inspiration. His playful wood engravings depict characters such as Viola, Sebastian, Sir Toby Belch and Malvolio in period costume on imaginary stages or in garden scenes. Decorative borders and vignettes enliven the pages.

The Golden Cockerel Press, owned by Robert Gibbings, himself an engraver, was famous for limited-edition, hand-printed books that benefited from the revival of wood engraving after the First World War.

The introduction by Alan Powers tells how this edition, growing out of a wider Shakespeare revival, was nearly derailed by the consequences of the economic Depression and how the resourcefulness and determination of those involved with the Press brought about this extraordinary version of Shakespeare's much-loved comedy.

'In this beautifully produced edition, the play's bittersweet mood is perfectly expressed in the texture and form of Ravilious's wood engravings. His coloured images bring just the right tinge of melancholy to the comedy.' — Emma Smith, author of *The Making of Shakespeare's First Folio*

About the author:

Gillian Dooley is an Honorary Senior Research Fellow in English at Flinders University. She has published and presented internationally on Jane Austen, and as a singer she has curated programmes of music from Austen's personal collection since 2007. She has appeared on Australian Broadcasting Corporation's *The Book Show* and *The Minefield* as an expert on Austen. Her most recent books are *Matthew Flinders: The Man behind the Map* and *Listening to Iris Murdoch: Music, Sounds, and Silences* (both 2022).

SHE PLAYED AND SANG

Jane Austen and music

GILLIAN DOOLEY

- Provides newly available information about Jane Austen's music collection
- Reads Jane Austen's novels alongside her knowledge of and interest in music
- Examines in detail Jane Austen's family relationships through the shared love of music
- Blends social history, music history and literary criticism to provide new insights in Jane Austen's life and work

Like her much-loved heroine Emma Woodhouse, Jane Austen 'played and sang'. Music occupied a central role in her life, and she made brilliant use of it in her books to illuminate characters' personalities and highlight the contrasts between them.

Until recently, our knowledge of Austen's musical inclinations was limited to the recollections of relatives who were still in their youth when she passed away. But with the digitisation of music books from her immediate family circle, a treasure trove of evidence has emerged. Delving into these books, alongside letters and other familial records, *She played and sang* unveils a previously unknown facet of Austen's world.

This insightful work not only uncovers the music closely associated with Austen, but also unravels her musical connections with family and friends, revealing the intricate ties between her fiction and the melodies she performed. With these revelations, Austen's musical legacy comes to life, granting us a deeper understanding of her artistic prowess and the influences that shaped her literary masterpieces.

SHELLS OF THE WORLD

A Natural History

M. G. HARASEWYCH

- Features hundreds of beautiful colour photos, depicting both the live animals and their shells
- Discusses mollusk evolution, anatomy, life cycles, behaviour and ecology
- Describes unique characteristics, distribution, habitat and size
- Provides valuable insights into the conservation of the world's marine mollusks
- Ideal for malacologists and shell collectors everywhere

A marvellously illustrated natural history of the world's mollusks. Mollusks are invertebrate animals with a remarkable natural history and a rich fossil record, and their shells are prized for their breathtaking variety and exquisite beauty.

Shells of the World provides a wide-ranging look at the incredible diversity of marine mollusks. An informative introduction outlines the lineages covered, followed by a directory section, split into classes, that profiles a broad selection of different taxa to give a sense of their sheer numbers and variety.

THE LIVES OF BUTTERFLIES
 A Natural History of Our Planet's Butterfly Life
 DAVID G. JAMES, DAVID J. LOHMAN

- **A beautifully illustrated introduction to the lives of butterflies around the world**

There are more than fifteen thousand butterfly species in the world, fluttering through a wide variety of habitats. Bright and beautiful, butterflies also have fascinating life histories and play an important role in our planet's ecosystems. *The Lives of Butterflies* showcases the extraordinary range of colours and patterns of the world's butterflies while exploring their life histories, behaviour, habitats and resources, populations, seasonality, defense and natural enemies, and threats and conservation.

With remarkable photography, graphic illustration, and profiles of thirty-five selected species, this comprehensive and inviting book discusses dozens of key topics, including eggs, caterpillars, and chrysalids; flight, feeding, courtship, and mating; migration and hibernation; concealment, mimicry, and predators; habitat loss and fragmentation, climate change, and pesticides; and farming and gardening to support and attract butterflies.

WASPS OF THE WORLD
 A Guide to Every Family
 SIMON VAN NOORT, GAVIN BROAD

- **Available Now!**
- **Features more than 250 stunning colour photos of numerous species**
- **Profiles more than 100 families, with absorbing commentary detailing the range, habits, and notable features of members of each family**
- **Every profile includes a distribution map and a table of essential facts about size, diet, reproduction, and habitats**
- **Discusses the evolution and biology of wasps, exploring the vital role they play in supporting healthy ecosystems**
- **Shows how scientific research is expanding our knowledge about wasps and their behaviour**

A richly illustrated guide to wasps around the world. Wasps have been around since before the dinosaurs and are one of the world's largest insect groups. More than 150,000 species have been identified, and while the black-and-yellow insect with a cinched waist may be the most familiar, most wasps are tiny parasitoids that use other insects for food.

Wasps of the World provides a breathtaking look at the diverse characteristics, habitats, and lifestyles of these extraordinary insects.

‘A smart, concise, and very up-to-date guide to the world’s oldest hatred.’ — David Baddiel, author of *Jews Don’t Count*

THE 7 DEADLY MYTHS

Antisemitism from the time of Christ to Kanye West (Second edition, revised and supplemented)

ALEX RYVCHIN

- **Written in a clear and compelling style, this book is essential to understanding why this ancient hatred continues to plague society, inspiring pop stars, athletes and demagogues alike**
- **A crucial resource for policy makers, students and the reading public seeking to understand racism and how it can be stopped**
- **This revised and supplemented second edition features some of the author’s most probing essays and speeches on antisemitism, published here for the first time**

The 7 Deadly Myths traces antisemitism from its earliest origins to the present day and uncovers the dangerous conspiracy theories that have corrupted reasoning and led people and nations to diabolical acts.

Exploring some of the most significant events in history and uncovering little-known villains, this book answers the questions of how antisemitism takes hold, how it is transmitted and how it inspires violence to the present day.

FIGHT FOR LIBERTY AND FREEDOM

The origins of Australian Aboriginal activism
JOHN MAYNARD

- **Newly updated and revised edition of the classic Aboriginal Studies Press bestseller**
- **Well known author with high profile in the media as commentator and historian**
- **Uncovers the roots of Aboriginal activism through the story of Fred Maynard and the Australian Aboriginal Progressive Association**
- **14 black and white illustrations**

Opposition to the British colonisation of Australia did not spring from the Mabo decision or the Native Title Act, nor was it born in the vibrant 1960s which culminated in the famous Aboriginal tent embassy in 1972.

Rather, the first politically organised and united all-Aboriginal activist group was the Australian Aboriginal Progressive Association (AAPA), begun in 1924 under the leadership of Frederick Maynard.

For the first time Aboriginal people voiced their disapproval in public in a well-organised way. They opened offices in Sydney, held street rallies, conducted public meetings, gained newspaper coverage, wrote letters and petitions to Government at all levels, and collaborated with the international black labour movement. The AAPA’s demands still resonate today.

‘This is a fascinating and original history, taut and suspenseful, written with subtlety and flair.’ — Tom Griffiths

‘Lachlan Strahan brings to life a lost world of rural Victoria in the era of gold-seeking, free selection and bushranging.’ — Frank Bongiorno

BODY SCULPTURE: JORDAN WOLFSON
 EDITED BY RUSSELL STORER

- **The creative vision for the publication has been driven by the artist and features stunning documentary photographs by David Sims and design by Joseph Logan**

Artist Jordan Wolfson is emblematic of the time in which we live. As we grapple with our relationship to technology, our immersion in internet culture, and with social issues of racial and gender inequality, alienation and violence, Wolfson confronts us with their images, actions and effects. His works act as witnesses on the world we are in right now, rather than taking a moral position or articulating a particular point of view. They are therefore often uncomfortable to experience, as well as being deeply intriguing in their extraordinary visual power and technical sophistication. *Body Sculpture* is the first work by Wolfson to enter an Australian collection. In this publication, the National Gallery has gathered robust ideas, facilitated discussions, and sought unique perspectives that position Wolfson’s major work within diverse contexts, including art history, cybernetics and media theory.

Contributors to *Body Sculpture: Jordan Wolfson* include Wolfson’s principal collaborator, Mark Setrakian; Richard Taylor of Wētā Workshop; Russell Ferguson, a curator, writer and longtime observer of Wolfson’s work; Genevieve Bell and Andrew Meares, from the Australian National University School of Cybernetics; artist Anne Imhof; and Russell Storer, Head of International Art at the National Gallery of Australia.

JUSTICE IN KELLY COUNTRY

The Story of the Cop Who Hunted Australia’s Most Notorious Bushrangers

LACHLAN STRAHAN

- **An attractive new B+ format of the popular text, first published in 2022**
- ***The Australian’s* ‘Notable Books 2022’**
- **Endorsements from Frank Bongiorno, Tom Griffiths, and Janet McCalman**

****Shortlisted, 2023 Prime Minister’s Literary Awards, Australian History Prize****

Part way through the Jerilderie Letter, Ned Kelly accused Senior Constable Anthony Strahan of threatening him: ‘he would not ask me to stand he would shoot me first like a dog’. Those few fateful words have echoed through Australian history as the cause of much bloodshed and violence. They marked Anthony forever and ushered in a national myth: the legend of the Kelly Gang. Two days after Anthony allegedly made this threat, Ned and his gang shot dead several police in an act of brutality that became known as the Stringybark Creek killings. Ned’s reason for opening fire? He said he had mistaken one cop for Strahan.

Lachlan Strahan, Anthony’s great-great-grandson, grew up with the familiar story of Ned Kelly, the egalitarian rebel, and his ancestor as the villainous cop who had threatened him. Yet as he began to probe into Anthony’s life, he discovered that the truth — and the Kelly legend it has given rise to — was more complex than he believed.

‘Stunning...This will challenge the way readers see the world.’ — Publishers Weekly

‘A thoughtful, well-rendered collection of musings on identity.’ — Kirkus Reviews

HOW TO BE MULTIPLE

The philosophy of twins

HELENA DE BRES, ILLUSTRATED BY JULIA DE BRES

- Uses the idea of being a twin to pose deep questions about personhood and how we can live together
- De Bres is both a trained philosopher and a twin, writing from her own experience. She is a widely published essayist, and this form of creative non-fiction is fashionable at the moment
- Illustrated by the author’s twin sister, an intriguing marketing hook

In *How to be multiple*, Helena de Bres — a twin herself — argues that twinhood is a unique lens for examining our place in the world and how we relate to other people. The way we think about twins offers remarkable insights into some of the deepest questions of our existence, from what is a person? to how should we treat one another?

Deftly weaving together literary and cultural history, philosophical enquiry and personal experience, de Bres examines such thorny issues as binary thinking, objectification, romantic love and friendship, revealing the limits of our individualistic perspectives.

‘Using an expository style, interspersed with first-person accounts of his own research, Harris provides an authoritative synopsis of developmental neuroscience.’ — R. Douglas Fields, Science

ZERO TO BIRTH

How the Human Brain Is Built

WILLIAM A. HARRIS

- **Now in Paperback!**
- A revelatory tale of how the human brain develops, from conception to birth and beyond

By the time a baby is born, its brain is equipped with billions of intricately crafted neurons wired together through trillions of interconnections to form a compact and breathtakingly efficient supercomputer. *Zero to Birth* takes you on an extraordinary journey to the very edge of creation, from the moment of an egg’s fertilisation through each step of a human brain’s development in the womb — and even a little beyond.

As pioneering experimental neurobiologist W. A. Harris guides you through the process of how the brain is built, he takes up the biggest questions that scientists have asked about the developing brain, describing many of the thrilling discoveries that were foundational to our current understanding. He weaves in a remarkable evolutionary story that begins billions of years ago in the Proterozoic eon, when multicellular animals first emerged from single-cell organisms, and reveals how the growth of a fetal brain over nine months reflects the brain’s evolution through the ages.

Our brains have much in common with those of other animals, and Harris offers an illuminating look at how comparative animal studies have been crucial to understanding what makes a human brain human.

‘This book excels in revealing how very modern the ancient world was in some respects, and yet how delightfully different in many other ways... [A] most enjoyable book.’ — David Smith, *Classics For All*

‘...*How to Focus* contains a wealth of sage advice that is as helpful and reassuring today as it was centuries ago. It’s a must-read for anyone who struggles to focus on their goals — that is, everyone.’ — Danièle Cybulskie, author of *How to Live Like a Monk: Medieval Wisdom for Modern Life*

HOW TO BE HEALTHY

An Ancient Guide to Wellness

GALEN, TRANSLATED BY KATHERINE D. VAN SCHAİK

- **Timeless wisdom about how to be healthy in body and mind from one of the greatest physicians of the ancient world**

The second-century Greek physician Galen — the most famous doctor in antiquity after Hippocrates — is a central figure in Western medicine. A talented doctor, surgeon, writer, philosopher, teacher, pharmacologist, and inventor, Galen attended the court of Marcus Aurelius, living through outbreaks of plague (likely smallpox) that devastated the Roman Empire. He also served as physician for professional gladiators, boasting that only two fighters died during his first year (his predecessor had lost sixteen). In writings that provided the foundation of Western medicine up to the nineteenth century, Galen created a unified account of health and disease. In *How to Be Healthy*, practicing physician and classical historian Katherine Van Schaik presents a collection of Galen’s enduring insights about how we can take care of our bodies and minds, prevent disease, and reach a healthy old age.

Although we now know that many of Galen’s ideas about physiology are wrong, *How to Be Healthy* shows that much of his advice remains sound.

HOW TO FOCUS

A Monastic Guide for an Age of Distraction

JOHN CASSIAN, TRANSLATED WITH COMMENTARY BY JAMIE KREINER

- **How you can learn to focus like a monk without living like one**

Distraction isn’t a new problem. We’re also not the first to complain about how hard it is to concentrate. Early Christian monks beat us to it. They had given up everything to focus on God, yet they still struggled to keep the demons of distraction at bay. But rather than surrender to the meandering of their minds, they developed powerful strategies to improve their attention and engagement. *How to Focus* is an inviting collection of their strikingly relatable insights and advice — frank, funny, sympathetic, and psychologically sophisticated.

This wisdom is drawn from John Cassian’s fifth-century CE *Collationes*, one of the most influential manuals for monks from late antiquity. The *Collationes* follow Cassian and his friend Germanus as they travel around Egypt, asking a series of sage monks how they can make their minds stronger. In response, these monks offer a range of techniques for increasing focus, including setting goals, training the body, managing the memory, using mantras, taking breaks, consulting others — and, most of all, being honest about yourself. As Cassian and Germanus eventually realise, we can’t escape distraction — but we can learn how to confront it and, eventually, to concentrate.

‘[A] clear-eyed, meticulously argued study...By bringing grief to philosophy Mr. Cholbi brings philosophy closer to the other humanities; he’s as incisive a critic as he is a philosopher.’
— Hamilton Cain, Wall Street Journal

GRIEF

A Philosophical Guide

MICHAEL CHOLBI

- **Now in Paperback!**
- **An engaging and illuminating exploration of grief — and why, despite its intense pain, it can also help us grow**

Experiencing grief at the death of a person we love or who matters to us — as universal as it is painful — is central to the human condition. Surprisingly, however, philosophers have rarely examined grief in any depth. In *Grief*, Michael Cholbi presents a groundbreaking philosophical exploration of this complex emotional event, offering valuable new insights about what grief is, whom we grieve, and how grief can ultimately lead us to a richer self-understanding and a fuller realisation of our humanity. Drawing on psychology, social science, and literature as well as philosophy, Cholbi explains that we grieve for the loss of those in whom our identities are invested, including people we don’t know personally but cherish anyway, such as public figures. Their deaths not only deprive us of worthwhile experiences; they also disrupt our commitments and values. Yet grief is something we should embrace rather than avoid, an important part of a good and meaningful life. The key to understanding this paradox, Cholbi says, is that grief offers us a unique and powerful opportunity to grow in self-knowledge by fashioning a new identity. Although grief can be tumultuous and disorienting, it also reflects our distinctly human capacity to rationally adapt as the relationships we depend on evolve.

ROGER FEDERER

The Biography

RENÉ STAUFFER

- **New in B-format, mass market paperback!**
- **This is the definitive biography of Roger Federer, one of the greatest tennis stars the world has ever seen**
- **Sales of over 6,000 copies in the UK**
- **Goes behind the scenes to cover a quarter century of Federer’s magnificent career**
- **Federer has won 20 Grand Slam men’s singles titles, an all-time record shared with Rafael Nadal. He is regarded as one of the greatest tennis players of all time, and has a huge and devoted fanbase**
- **Insightful, touching and revealing, the book features original interviews with friends, family and Roger Federer himself**

René Stauffer has been closely covering Roger Federer’s career for nearly 25 years. In this comprehensive biography, Stauffer talks at length to the man himself, his family, friends, coaches and rivals to paint an unrivalled picture of the greatest male tennis player of all time. From his early life in Basel, Switzerland, where he first picked up a tennis racquet, to the heights of his 20th Grand Slam victory and all points in between, Stauffer reveals the secrets to Federer’s success, the hardships and doubts that he has faced and examines the legacy that Federer has created in the modern game.

GEOPOLITICS FOR THE END TIME

From the Pandemic to the Climate Crisis
BRUNO MAÇÃES

- **Now in paperback!**
- **A sharp vision of our changing world order as Covid and climate breakdown usher in a new ‘survival of the fittest’**
- **One of the first books to anticipate the profound ways in which the pandemic has led to a new world-political landscape**
- **Author has written other hugely successful books including *History Has Begun* which was longlisted for The Orwell Prize for Political Writing (2021) and *Belt and Road***

How well have different cultures and societies responded, and could this become a turning point in the flow of history?

Before Covid, a new competition was already arising between alternative geopolitical models — but the context of this clash wasn’t yet clear. What if it takes place on neutral ground? In a state of nature, with few or no political rules, amid quickly evolving chaos? When the greatest threat to national security is no longer other states, but the environment itself, which countries might rise to the top?

This book explores how Covid-19 has already transformed the global system, and how it serves as a prelude to a planet afflicted by climate change.

THE SHINING TRIBE TAROT

The Definitive Edition (83 Cards and 272-Page Full-Color Guidebook)

RACHEL POLLACK

- Rachel Pollack’s recent passing has only made her work more celebrated and her legacy more appreciated
- *The Shining Tribe Tarot*, a project very dear to Rachel’s heart-offers an expansive view of the various manifestations of the divinatory arts throughout history and cultures
- The whole concept of the ‘tarot tribe’, which Rachel evokes, is very appealing

From the renowned author of *Seventy-Eight Degrees of Wisdom*, widely referred to as the ‘tarot bible’, this deck and guide book invite readers to join the ‘shining tribe’ of diviners and take the timeless sacred journey of self-discovery. Human beings have practiced the art of divination for millennia. In some cultures, diviners studied patterns in nature — the flight of birds, the forms of clouds, or the arrangement of the stars in the night sky. In others, they created elaborate divinatory systems such as the *I Ching* and the Tarot. Drawing from the legacy of 50,000 years of human encounters with the Divine, renowned Tarot scholar Rachel Pollack has created *The Shining Tribe Tarot*.

HIGHER GROUND

How Business Can Do the Right Thing in a Turbulent World

ALISON TAYLOR

- ***Higher Ground* shows leaders how business can navigate this messy paradigm shift, build trust, and achieve long-term strategic advantage in a turbulent world**

An indispensable guide to help companies navigate the new era of ethical challenges and risks in a volatile global landscape. Today's headlines teem with employee unrest over racial injustice, communities infuriated by corporate environmental impacts, staff anxiety over surveillance, public outrage over corruption in business, and discoveries of child labor in supply chains. We've travelled far and fast from the old world of business ethics, where black-and-white concerns about bribery and fraud could be addressed via rules and processes. Simply maximising shareholder value while not breaking the law is no longer a tenable approach, but we've never been so confused about what it means to do the right thing — and why it's so important.

In this eye-opening, essential book, NYU Stern ethics professor Alison Taylor argues that amid stakeholder demands and transparency pressures, we can no longer treat ethics as merely a legal and reputational defense mechanism. Leaders at Davos and the Business Roundtable have called for a new corporate responsibility paradigm, but organisations struggle to implement these ideas in an atmosphere of heightened expectations and intense suspicion.

FUSION STRATEGY

How Real-Time Data and AI Will Power the Industrial Future

VIJAY GOVINDARAJAN, VENKAT VENKATRAMAN

- **An in-depth look under the hood of digital-first companies such as Facebook and Amazon, and how they use datagraphs — large, interconnected datasets — to make decisions**
- **Fascinating analysis of how technology is rapidly changing the industrial sector — one of largest sectors of the US economy**
- **Sweeping case studies of companies using next-gen technology to improve their products and strategies, including Tesla, Mercedes Benz, and John Deere**
- **Hands-on and practical advice to help readers use real-time data to improve their products and customer relationships**

Two world-renowned experts on innovation and digital strategy explore how real-time data and AI will radically transform physical products — and the companies that make them. Tech giants like Facebook, Amazon, and Google can collect real-time data from billions of users. For companies that design and manufacture physical products, that type of fluid, data-rich information used to be a pipe dream. Now, with the rise of cheap and powerful sensors, supercomputing, and artificial intelligence, things are changing — fast.

OPEN TALENT

Leveraging the Global Workforce to Solve Your Biggest Challenges
JOHN WINSOR, JIN H. PAIK

- A fresh take on open talent in the context of the future of work and digital transformation
- Authors provide a useful framework
- Based on impressive & growing LISH research
- Book contains cool, interesting stories

In the new world of hybrid work and AI, one thing is clear: the war for talent is over — and talent won. With sparsely populated offices and people working from wherever they are, and with AI emerging everywhere in business and dominating headlines, our work lives have undergone a remarkable transformation, seemingly overnight. But the reality is that for years the ever-growing digital wave has been breaking down organisational boundaries and increasing the adoption of open innovation, including the use of crowdsourcing platforms as a talent solution. Now the imperative is clear: adapt to and leverage this new, digitally enabled world of ‘open talent’ — or get left behind.

In this eye-opening, essential guidebook, John Winsor and Jin Paik, with their work at the Laboratory for Innovation Science at Harvard, show how the massive reset of the pandemic allowed talented workers everywhere to exit their jobs without leaving the workforce.

MANAGING YOUR ANXIETY (HBR EMOTIONAL INTELLIGENCE SERIES)

HARVARD BUSINESS REVIEW, ALICE BOYES, JUDSON BREWER, RASMUS HOUGAARD, JACQUELINE CARTER

- Highly curated collection of *HBR* articles
- A variety of perspectives from recognised experts on the topic
- Provides research on the connections between anxiety and performance
- Teaches readers how to identify and manage their triggers

What’s the worst that can happen?

Anxiety is the most prevalent mental disorder worldwide. But rumination, worry, and catastrophising don’t have to hold you back at work. By understanding how anxiety works, you can better manage these feelings.

This book will help you distinguish stress from anxiety, use self-compassion and mindfulness to combat the symptoms, find the support you need, and move forward more comfortably and confidently in your job.

The *HBR Emotional Intelligence Series* features smart, essential reading on the human side of professional life from the pages of *Harvard Business Review*. Each book in the series offers proven research showing how our emotions impact our work lives, practical advice for managing difficult people and situations, and inspiring essays on what it means to tend to our emotional well-being at work.

BLUE OCEAN STRATEGY + BEYOND DISRUPTION COLLECTION (2 BOOKS)

W. CHAN KIM, RENÉE A. MAUBORGNE

- The two landmark books, *Blue Ocean Strategy* and *Beyond Disruption*, that together challenge everything you thought you knew about winning the future

These two iconic books, *Blue Ocean Strategy* and *Beyond Disruption*, together changed how the world thinks about strategy and innovation. *Blue Ocean Strategy*, the #1 global bestseller, reframed strategy not as a game between rivals fighting over markets and customers but as a new approach to creating markets and attracting customers — in untapped new market spaces free of competition.

Just as *Blue Ocean Strategy* redefines the essence of strategy, *Beyond Disruption* redefines and expands the existing view of innovation by introducing a new approach, non-disruptive creation, that is free from the destructive displacement of jobs, people, companies, and industries that happens when companies set out to disrupt. Taken together, these bestselling books will help you chart a bold new path to winning the future.

'In this engaging and substantive book intended to demonstrate the beauty of applied mathematics to mathematicians both applied and pure — take that, G. H. Hardy! — Paul Nahin skillfully explains the mathematics, technology, and social impact of radio.' — Judith V. Grabiner, Pitzer College

STUDIO GHIBLI

The films of Hayao Miyazaki and Isao Takahata

MICHELLE LE BLANC, COLIN ODELL

- **New and updated edition of this popular guide, that has sold over 15,000 print copies, expanded to include the latest Ghibli productions: *Earwig and the Witch* (2020) and *The Boy and the Heron* (2023)**
- **Studio Ghibli films have achieved astonishing critical acclaim and won countless awards, including the Academy Award for Best Animated Film for *Spirited Away***

The animations of Japan's Studio Ghibli are among the most respected in the movie industry. Their films rank alongside the most popular non-English language films ever made, with each new eagerly anticipated release a guaranteed box office hit. Yet this highly profitable studio has remained fiercely independent, producing a stream of imaginative and individual animations. The studio's founders, Hayao Miyazaki and the late Isao Takahata, have created timeless masterpieces. Although their films are distinctly Japanese, their themes are universal: humanity, community and a love for the environment. No other film studio, animation or otherwise, comes close to matching Ghibli for pure cinematic experience.

Studio Ghibli outlines the history of the studio and explores the early output of its founders. It examines all the studio's major works.

THE MATHEMATICAL RADIO

Inside the Magic of AM, FM, and Single-Sideband

PAUL J. NAHIN, FOREWORD BY ANDREW SIMOSON

- **How a modern radio works, told through mathematics, history, and selected puzzles**

The modern radio is a wonder, and behind that magic is mathematics. In *The Mathematical Radio*, Paul Nahin explains how radios work, deploying mathematics and historical discussion, accompanied by a steady stream of intriguing puzzles for math buffs to ponder. Beginning with oscillators and circuits, then moving on to AM, FM, and single-sideband radio, Nahin focuses on the elegant mathematics underlying radio technology rather than the engineering. He explores and explains more than a century of key developments, placing them in historical and technological context.

Nahin, a prolific author of books on math for the general reader, describes in fascinating detail the mathematical underpinnings of a technology we use daily. He explains and solves, for example, Maxwell's equations for the electromagnetic field. Readers need only a familiarity with advanced high school-level math to follow Nahin's mathematical discussions. Writing with the non-engineer in mind, Nahin examines topics including impulses in time and frequency, spectrum shifting at the transmitter, the superheterodyne, the physics of single-sideband radio, and FM sidebands.

THE LIVES OF LITERATURE

Reading, Teaching, Knowing

ARNOLD WEINSTEIN

• **Now in Paperback!**

- **A passionate, wry, and personal book about how the greatest works of literature illuminate our lives**

Why do we read literature? For Arnold Weinstein, the answer is clear: literature allows us to become someone else. Literature changes us by giving us intimate access to an astonishing variety of other lives, experiences, and places across the ages.

Reflecting on a lifetime of reading, teaching, and writing, *The Lives of Literature* explores, with passion, humour, and whirring intellect, a professor's life, the thrills and traps of teaching, and, most of all, the power of literature to lead us to a deeper understanding of ourselves and the worlds we inhabit.

'Weinstein presents an irresistible thesis in this agile, instantly engaging work of personal literary criticism' — Hephzibah Anderson, *The Observer*

THE BANKERS' NEW CLOTHES

What's Wrong with Banking and What to Do about It — New and Expanded Edition

ANAT ADMATI, MARTIN HELLWIG

- **Why our banking system is broken — and what we must do to fix it?**
- **A *Wall Street Journal*, *Financial Times*, and *Bloomberg Businessweek* Book of the Year**

New bank failures have been a rude awakening for everyone who believed that the banking industry was reformed after the Global Financial Crisis — and that we'd never again have to choose between massive bailouts and financial havoc.

The Bankers' New Clothes uncovers just how little things have changed — and why banks are still so dangerous. Writing in clear language that anyone can understand, Anat Admati and Martin Hellwig debunk the false and misleading claims of bankers, regulators, politicians, academics, and others who oppose effective reform, and they explain how the banking system can be made safer and healthier.

TOOLS TO SAVE OUR HOME PLANET

A Changemaker's Guidebook

EDITED BY NICK MUCHA, PATRICK THOMAS, JESSICA FLINT

- **A go-to resource for driving change, offering anyone who is passionate about environmental and social justice a timely and relevant resource to support their mission-aligned work, this book is intended for both those who are new to taking action and seasoned activists and community organisers who want to learn how others are finding success**
- **A Global Guidebook for Activism in the Age of Climate Chaos and Social Injustice**

In 1994, Patagonia invited representatives from 75 grassroots nonprofit organisations to gather and learn from active experts how to be more effective at what they do. Through this ongoing conference as well as years of funding these organisations, Patagonia has helped thousands of activists make the changes they envision for the world.

WHAT ARE PRISONS FOR?

HINDPAL SINGH BHUI

- **Blends personal, professional and theoretical perspectives to address big questions around the purpose of incarceration**
- **Author has 20 years' experience of working in prisons which he uses to demystify and illuminate the debate**
- **Allows the voices of prisoners, prison staff and victims to be heard**

What does a good prison look like? Over eleven million people are currently locked up in prisons across the world, but does that mean that prison actually works? The answer usually depends on what people believe and feel about crime, punishment and what happens inside prisons. The deep social and personal impact of prisons demands that we try to search for a better understanding of the evidence and ideas that have made prisons so ubiquitous. Hindpal Singh Bhui, with 20 years' experience of visiting and working in prisons worldwide, argues that we need to look at who is sent there and why, to disentangle reality from ideology and myth.

WHAT IS HISTORY FOR?

ROBERT GILDEA

- **Many historians mellow with age; Robert Gildea, who won the Wolfson Prize for History in 2003, has got angrier about multiple forms of injustice, and this book channels that anger constructively into exploring how both ancient and modern history can be a force for good**
- **Advocates a kind of 'citizen history', akin to citizen journalism, as a complement to professional historians**

'History', suggests Robert Gildea, 'is a battlefield.' Questions of power, rights, identity and nationhood always have an ancient and modern historical dimension and countries still go to war over their interpretation of history. Yet accounts of history are just as prone to fabrication as fake news, so how can we tell good history from bad? How can history be critical, learning from the past and righting wrongs, rather than divisive, such as riding roughshod over the rights of others? In this passionately argued book, Gildea suggests that the more people who really understand what good history entails, the more likely history is to triumph over myth.

WHAT ARE THE OLYMPICS FOR?

JULES BOYKOFF

- **Proposes that the Olympics are not primarily for the athletes or spectators they're for moneymaking and the narrow interests of the International Olympic Committee**
- **Makes the bold proposal that the current IOC should be abolished and new leadership take its place, drawn from new generation of socially conscious, politically engaged athletes**
- **To be published in run-up to 2024 Paris games**

'Athletes first' is a slogan the International Olympic Committee often touts, but the reality is very different, as preeminent Olympics expert Jules Boykoff shows in this book. While the world's attention is riveted by the triumphs and tribulations on their screens, there is much that goes on behind the scenes that is deeply troubling: athletes are increasingly voicing concerns over physical, mental and sexual abuse, and they are collectively expressing grievances around equity and human rights.

A WOMAN'S GUIDE TO INNER CHILD HEALING

Overcome Trauma, Recognize Your Feelings, Learn to Let the Past Go, and Become the Best Version of Yourself

GLORIA ZHANG

- **Permanently escape your cycle of emotional turmoil using a variety of intuitive exercises and informative guides expertly crafted by an experienced registered psychotherapist and relationship coach!**

Rediscover your most authentic self before grief, societal conditioning, and complicated parents, and heal your core wounds in order to redefine yourself! At birth, we are the fullest and most vibrant expressions of ourselves. Some of us, however, lose this radiance due to one or more tragic life circumstances that robbed us of a beautiful childhood, whether it be the loss of a parent, emotional neglect, or even an abusive upbringing. As adults, we're left stumbling through life, yearning for even a taste of that childhood wonder as we ask ourselves, 'How the hell did I get here?'

BETTER DAYS

Tame Your Inner Critic

NEAL ALLEN

'Better Days will help you get to know your inner critic, and quiet its yammering, and in so doing, get to know the person you were born to be.' — Anne Lamott, author of *Dusk Night Dawn*

- **Not a heavy self-help read, super accessible and upbeat**
- **Perfect for the reader wanting quick shifts and immediate impact**
- **Includes reading group guide and references**

In this life-changing book, writer and spiritual coach, Neal Allen, teaches us a stunning new method for quieting the inner critic. What if your superego has it wrong? That snarky little bully in your head you know the one. You've lived under its weight for decades.

I'm a fraud, I'm lazy. I need to work harder. I need to be tougher, funnier, calmer. I need to stay quiet, look pretty, stop showing off. I need to put others before me, I need to put myself first. I need to be perfect. I need to hide who I really am.

Sound familiar? You know that its scolding voice is harmful to you, but you can't will it away. You accept a life with short periods of peace and long stretches of stress and anxiety. But you don't have to.

THE MEDIUM OF LEONORA CARRINGTON

A feminist haunting in the contemporary arts

CATRIONA MCARA

'Carrington, in McARA's perceptive analysis, becomes a powerful embodiment of a surrealist ethics of the present.' — Anna Watz, editor of *Surrealist women's writing*

- **Provides a fuller understanding of Carrington's significance to contemporary culture and politics**
- **Makes a case for Carrington's centrality to contemporary feminist art practices**
- **Argues for isolation in the creative process as a feminist activity**
- **Presents original interviews with a range of creative intellectuals responding to Carrington**

Before her death, the artist and writer Leonora Carrington (1917-2011) had already garnered a cult following, with numerous creative people making the pilgrimage to meet her at her home in Mexico City. Since then, her fame has only increased.

THE ODD QUANTUM

SAM TREIMAN, FOREWORD BY HELEN QUINN

- **An acclaimed physicist's accessible yet rigorous introduction to quantum mechanics for nonspecialists**

'A concise and beautifully written summary of an expert's view of the subject.'— Barry R. Holstein, *American Journal of Physics*

This is a rare and much-needed book: a concise but comprehensive account of quantum mechanics for popular science readers written by a respected physicist. Sam Treiman — who was internationally renowned for his work in particle physics — makes quantum mechanics accessible to non-specialists. Combining mastery of the material with clear, elegant prose and infectious enthusiasm, he conveys the substance, methods, and profound oddities of the field.

Treiman begins with an overview of quantum mechanics. He sketches the early development of the field by Einstein, Bohr, Heisenberg, Schrödinger, and others, and he makes clear how the quantum outlook flies in the face of common sense. As he explains, the quantum world is intrinsically probabilistic.

WHY SIZE MATTERS

From Bacteria to Blue Whales

JOHN TYLER BONNER

- **As this elegantly written book shows, size affects life in its every aspect. It is a universal frame from which nothing escapes**

'Bonner has written a book in a friendly voice that enlarges the picture of how everyone, big and small, thinks of size and why it matters very much.'
— *Biology Digest*

John Tyler Bonner, one of our most distinguished and creative biologists, here offers a completely new perspective on the role of size in biology. In his hallmark friendly style, he explores the universal impact of being the right size. By examining stories ranging from *Alice in Wonderland* to *Gulliver's Travels*, he shows that humans have always been fascinated by things big and small. Why then does size always reside on the fringes of science and never on the center stage? Why do biologists and others ponder size only when studying something else — running speed, life span, or metabolism?

DESIRE: APERTURE 253

Winter 2023 Issue

EDITED BY APERTURE

- In *Desire*, photographers render reality as unearthly — and take the viewer somewhere else altogether
- *Aperture* magazine releases winter issue, *Desire*, featuring an expansive interview with renowned fashion photographer Juergen Teller

'Photographs can abet desire in the most direct, utilitarian way,' Susan Sontag observed. Hers was a reference to more prurient activities, but she also allowed that desire could be abstract, something more slippery. The compulsion to want — or, in today's parlance, to manifest — emerges throughout *Aperture's* winter 2023 issue, *Desire*, as both an impulse and a state of mind.

CENTERS OF POWER IN THE ARAB GULF STATES

KRISTIAN COATES ULRICHSEN

- A comprehensive examination of the nature of power in the Gulf, comparing and contrasting its origins, exercise and opposition in six Arab countries
- Assesses the Arabian Peninsula as a whole, filling a significant gap in the literature

How are authority and influence accumulated and wielded across the six Gulf states? Mixing theoretical and empirical insights, and utilising both historical and contemporary examples, this book offers a comparative analysis of military, political, economic and religious power in Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the UAE, as well as of the power of narrative.

From bureaucrats to scholars, and from royals to opposition figures, Coates Ulrichsen uncovers the power relations shaping the Gulf today.

HEALING PLUTO PROBLEMS

An Astrological Guide
DONNA CUNNINGHAM,
FOREWORD BY LISA STARDUST

- Discover how understanding Pluto in your birth chart can help you understand aspects of your childhood, adulthood, and your life
- For intermediate and advanced students of astrology seeking advanced studies

In *Healing Pluto Problems*, Donna Cunningham explains how Pluto functions in the birth chart and shows how Plutonian problems can manifest throughout one's life. Pluto's energy is extremely potent and powerful. In astrology, it is considered a 'generational planet' — the length of its orbit (248 years) means it influences both individuals and entire generations as it travels through the zodiac.

ALL WE HAVE IS THE STORY

Selected Interviews (1973-2022)
JAMES KELMAN

- Novelist, playwright, essayist, and master of the short story. Artist and engaged working-class intellectual as well as committed revolutionary activist

Drawing deeply on a radical tradition that is simultaneously political, philosophical, cultural, and literary, James Kelman articulates the complexities and tensions of the craft of writing; the narrative voice and grammar; imperialism and language; art and value; solidarity and empathy; class and nation state; and, above all, that it begins and ends with the story. From his first publication, a short story collection *An Old Pub Near the Angel* through his latest novel *God's Teeth and other Phenomena*, and work with Noam Chomsky, *Between Thought and Expression Lies a Lifetime* — both published on a slightly larger American press, *All We Have Is the Story* chronicles the life and work — to date — of 'Probably the most influential novelist of the post-war period.' — *The Times*.

MARKETS AND POWER IN DIGITAL CAPITALISM

PHILIPP STAAB

- For readers of Shoshana Zuboff's *The Age of Surveillance Capitalism* and Thomas Piketty's *Capital*
- Translation of bestselling book in Germany
- Publicity interest expected

Markets and power in digital capitalism delves into the complex world of modern capitalism, where technology giants reign supreme. From Google and Apple to Amazon and Tencent, these internet behemoths have reshaped the economic landscape, transforming capitalism as we know it.

Philipp Staab takes readers on a thought-provoking journey through the virtual realm, exploring how digital surveillance and evaluation practices have infiltrated every aspect of our lives. What sets digital capitalism apart, he argues, is the rise of 'proprietary markets'.

RAJNEESHPURAM

Inside the Cult of Bhagwan and Its Failed American Utopia

RUSSELL KING

- *Rajneeshpuram* is a fresh examination of the Rajneesh story, using newly available information and interviews with high-ranking disciples who have never before shared their stories
- Goes beyond the story of the Netflix hit *Wild Wild Country*

In 1981, ambitious young Ma Anand Sheela transported the Indian guru Bhagwan Shree Rajneesh to the United States to fulfill his dream of creating a utopia for his thousands of disciples. Four years later, the incendiary Rajneeshpuram commune in Oregon collapsed under the weight of audacious criminal conspiracies hatched in its inner sanctum, including the largest bioterrorism attack in US history, an unprecedented election fraud scheme, and multiple attempted murders.

THE END OF EMPIRES AND A WORLD REMADE

A Global History of Decolonization

MARTIN THOMAS

- A capacious history of decolonisation, from the decline of empires to the era of globalisation

Empires, until recently, were everywhere. They shaped borders, stirred conflicts, and set the terms of international politics. With the collapse of empire came a fundamental reorganisation of our world. Decolonisation unfolded across territories as well as within them. Its struggles became internationalised and transnational, as much global campaigns of moral disarmament against colonial injustice as local contests of arms. In this expansive history, Martin Thomas tells the story of decolonisation and its intrinsic link to globalisation. He traces the connections between these two transformative processes: the end of formal empire and the acceleration of global integration, market reorganisation, cultural exchange, and migration.

UTOPIA

THOMAS MORE

- Part of the *Hero Classics* series

Utopia is a distant island where the inhabitants are thriving and justice and reason prevail, in contrast to the realities of sixteenth-century Europe, where greed, superstition and unenlightened tradition reign.

Using the framework of a traveller's account to a fictional land, Thomas More created an ingenious treatise which envisioned a more humanist approach to laws and social structures, and coined the now common term 'utopia'.

The *Hero Classics* series: *Meditations*, *The Prophet*, *A Room of One's Own*, *Incidents in the Life of a Slave Girl*, *The Art of War*, *The Life of Charlotte Bronte*, *The Republic*, *The Prince*, *Narrative of the Life of Frederick Douglass*, *an American Slave*, *Utopia*.

ESSAYS ON THE GREAT DEPRESSION

BEN S. BERNANKE

- From the Nobel Prize-winning economist and former chair of the U.S. Federal Reserve, a landmark book that provides vital lessons for understanding financial crises and their sometimes-catastrophic economic effects

As chair of the U.S. Federal Reserve during the Global Financial Crisis, Ben Bernanke helped avert a greater financial disaster than the Great Depression. And he did so by drawing directly on what he had learned from years of studying the causes of the economic catastrophe of the 1930s — work for which he was later awarded the Nobel Prize. *Essays on the Great Depression* brings together Bernanke's influential work on the origins and economic lessons of the Depression, and this new edition also includes his Nobel Prize lecture.

CRIMES OF THE CENTURIES

The Cases That Changed Us

AMBER HUNT

9 781454 949107

- **Amber Hunt is the host of both the *Accused* and the *Crimes of the Centuries* podcasts, the latter of which was named one of the year's Top 10 Podcasts of 2021 by *Rolling Stone* magazine**
- ***Crimes of the Centuries* will feature approximately 40 photographs throughout, with a striking red-and-black design that will make it pop off the shelves**

A fascinating pop-history dive into the stories behind the incredibly impactful crimes — both infamous and little-known — that have shaped the legal system as we know it. When asked why true crime is so in vogue, Pulitzer Prize-winning journalist and *New York Times* bestselling author Amber Hunt always has the same answer: it's no hotter than it's always been.

AUSTRALIA & THE PACIFIC

A history
IAN HOSKINS

****Winner of the 2023 Frank Broeze Memorial Maritime History Book Prize****

- **A ground-breaking history of Australia in relation to its Pacific neighbours**
- **Ian Hoskins is the prize-winning author of *Sydney Harbour and Coast***

Australia's deep past and its modern history are intrinsically linked to the Pacific. In *Australia & the Pacific*, Ian Hoskins — award-winning author of *Sydney Harbour and Coast* — expands his gaze to examine Australia's relationship with the Pacific region; from our ties with Papua New Guinea and New Zealand to our complex connections with China, Japan and the United States. This revealing, sweeping narrative history begins with the shifting of the continents to the coming of the first Australians and, thousands of years later, the Europeans who dispossessed them.

SMUGGLED

An illegal history of journeys to Australia

RUTH BALINT, JULIE KALMAN

****Shortlisted for the 2023 Frank Broeze Memorial Maritime History Book Prize****

- **True stories and first-hand lived experiences of asylum seekers and refugees**
- **A diverse range of voices from Austria, Hungary, Vietnam, Myanmar/Burma, Ethiopia, Iraq, Afghanistan and more**
- **Features prominent names including Les Murray, Mirka Mora, Dr. Munjed Al Muderis and Behrouz Boochani**

People smugglers are the pariahs of the modern world. There is no other trade so demonised and, yet at the same time, so useful to contemporary Australian politics. But beyond the rhetoric lies a rich history that reaches beyond the maritime borders of our island continent and has a longer lineage than the recent refugee movements of the twenty-first century.

CLOSE TO THE SUBJECT

Selected Works

DANIEL BROWNING

****Shortlisted for the 2024 Victorian Premier's Literary Awards — Indigenous Writing****

- **Feature-length essays on, and interviews with, high-profile First Nations artists, activists and writers**
- **Insightful and cutting edge commentary on First Nations arts and culture**
- **An eclectic collection, blending memoir, poetry and essay**

This book is a collected works of one of Australia's most accomplished media personalities. Chronicling his career since 2007, *Close to the Subject* presents a selection of pieces from Daniel Browning's stellar career as a journalist, radio broadcaster, critic and interviewer. Alongside conversations with the likes of the late Archie Roach, Doris Pilkington, and Vernon Ah Kee, the book contains a series of critical essays displaying Browning's talent as an Australian cultural critic and public intellectual.
