**THIS BOOK IS FULL OF HOLES**  
From Underground to Outer Space and  
Everywhere in Between

NORA NICKUM, ILLUSTRATED BY ROBERT  
MEGANCK

- Fascinating and quirky exploration of holes, from human-made holes to blue holes, sinkholes and even blowholes!
- Shares interesting facts about the origins of different holes, and how they are each important
- Covers a variety of STEAM disciplines, including physics, engineering, geology, ecology, music, and art history

Age range 8 to 12

When you think of holes, what comes to mind? Maybe the irritating hole in your sock. Or the hole on the shelf where you plucked out this book.

A hole can be surprising, like a sinkhole appearing overnight. Holes can be useful, like the tiny openings in aeroplane windows, or dramatic, like a mine that's visible from space. They can even be lifesaving, like a seal's breathing hole in the ice.

Holes are important to our everyday lives. They are investigated by scientists, used by artists, designed by engineers, and fixed by problem-solvers. They can be natural or human-made, big or small, plentiful or scarce, mysterious or very familiar. You'll find this book is chock full of holes — why not take a peek inside!

Reading level varies from child to child, but we recommend this book for ages 8 to 12.

*The Girl from the Great Sandy Desert* is the charming account of the life of Mana, a young Walmajarri girl, and her family in the desert country of north-west Australia. Mona's semi-autobiographical narrative is set before European settlement impacted their lives.

Complementing each story are cultural insights that enhance the understanding of desert life, and makes for compelling reading for all ages.
